

Dream Lake (Phase I) has total living area of 34.000 sq. m.

The investments in the project will be more than 15 million Euros.

The complex covers more than 37.000 square meters in the mountains.

Almost half of the complex area is covered with parks and leisure facilities.

Besides the living and leisure parts, the development includes all facilities needed for conference tourism and corporate events.

The expected rise of the prices after Bulgaria's joining of the European Union in 2007 makes the Complex even more attractive. The contractor will handle all maintenance and rental management issues (including minimum rental income guaranteed - please see the payment plans page) of the apartments upon owner's request. Considering the great range of facilities offered and the advantages of the apartment characteristics - modern kitchen and convenient family lodging, all analysts are positive that the Dream Lake Complex will easily win market share among the vacation villages in Pamporovo.
